- Work Ethic
- Willingness to learn
- Critical thinking
- Problem-solving
- Empathy

Education Background

Belarusian National
Technical University

*Faculty of transport communications :
engineer - designer*

Completed in 2011

About Me

My goal is to get maximum knowledge about front-end development and to become an in-demand specialist to realize my potention. I'm a good teamworker and I like to communicate with different people. I also have the code reading skills.
At the moment I am taking courses to improve my English.

Experience

Trainee Front-end Developer, IT-Academy
2021 – 2022

work on the course project Weather App:
- use of services to make the http get calls which returns an observable;
- subscribe to the service by using rxjs subscribe method;
- create class that holds common properties which can be used in the current weather calculation;
- use routing to navigate between pages;
- use angular material for dropdown;
